

## **Machine Learning Software Engineer**

**We are a growing technology company shaping financial processes for our B2B clients. We provide excellent customer care and take pride in lean and easy-to-use software.**

If you are a visionary Machine Learning Software Engineer (m/f), ready to take our machine learning technology to the next level — then we are looking for you!

### **The Tasks:**

1. Create machine learning algorithms to improve financial processes
2. Develop predictive and forecasting models
3. Work in an interdisciplinary team
4. Create statistical models
5. Develop solutions for processing large measurement datasets

### **About you:**

1. MS or PhD in Statistics or related area including Mathematics and/or Computer Sciences with previous experience in machine learning/AI
2. Strong software programming & engineering background
3. Deep understanding of statistical, predictive modeling
4. Proven track record of industry experience in machine learning and computer vision, feature engineering, AI
5. Proactive, passionate, fast learner with attention to detail

### **What you can expect:**

1. A community of passionate colleagues focusing on creating a great product
2. Competitive remuneration
3. A professional, highly efficient developer team which likes to have fun at work and after
4. Autonomy and plenty of learning opportunities

So, think you're ready to make a huge impact in our team? Please send us your CV and a few work samples to [alpha.employment@outlook.com](mailto:alpha.employment@outlook.com)
